DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,6 are rejected under 35 U.S.C. 102(b) as being anticipated by Boudec et al. [Connectionless Data Service in an ATM-based Customer Premises Network]

Regarding claims 1-8, Boudec et al. disclose all the following subject matters:
Multipoint-to-point transmission (**pg 1418, left Col. 2nd paragraph**) method for sending frames of data from at least two sending nodes (**fig. 5, switch 1 to 3**) via one or more forwarding nodes to one receiving node in an ATM network wherein each frame of data is partitioned into cells, comprising the steps of:

the sending nodes include a first label into each of the cells representing an identification of the routing of the cell, (**fig. 5, cell header '4u' - switch 4, port u; fig. 4; pgs. 1416 to 1417**)

the sending nodes include a second label into each of the cells representing an identification of the source of the cell, (**fig. 5, MID for example "m"; pg 1418, left and right columns**)

the forwarding node swaps both the first label associated with a forward direction and the second label associated with a backward direction using a swapping table. (**fig.**
